CONSULTATIVE DESIGN APPROACH

Renegade's consultative approach makes the process fun, inviting you into the creative process. Named appropriately, this team is comprised of renegades—so there is no script to their boundless creativity. However, here's the general framework of their strategic approach.

- \01 BRAIN DUMP AND Q&A**
We'll shake hands and get acquainted. Before diving into details, we'll talk about the big picture of your project, ask and answer questions, and assess our fit.
- \02 SITE VISIT**
Let's see your space! At this meeting, we'll go where the action happens. We'll brainstorm innovative ideas and start digging deeper into your needs and wants.
- \03 CONCEPTUAL DESIGN**
With a curated understanding of your needs and desires, we'll create a unique design and refine it to perfection.
- \04 CONSTRUCTION**
After approvals, your unique design will come to life in our workshop. Interested in seeing it built? Visit our on-site wood shop location during construction.
- \05 INSTALLATION**
We love it when a plan comes together! After all our hard work, our carpenters will deliver and install your unique creation.
